

EASYASSIST 200 PTT

Push to Talk

EASYASSIST 200 PTT Push to Talk

Powered by AlertTech

YES, WE'RE HERE

Every work environment benefits from the instant communication of two-way radios, but it's not always economical or prudent to equip every employee; in the case of visitors or customers-it's not possible. EasyAssist is an instant resource for connecting people and places to your existing radio investment.

At the push of a button customers who were looking for an employee are assured someone is on their way, associates are let in a locked door, a manager is called to the location, or a visitor is acknowledged. Each EasyAssist is fully customizable to its mission without any special tools using a best in class interface.

Actual Size

EasyAssist PTT can be mounted securely and semi-permanently to any surface with our sturdy mounting hardware or attached using included 3M™ Dual Lock™ industrial fastener strips. The options fit your deployment. The EasyAssist is assembled from the highest quality components and designed with a focus on durability.

Completely wireless and compatible with any radio, each EasyAssist PTT is engineered to give you long-lasting functionality. EasyAssist does not require complicated installation. Just mount it to the desired surface and you've instantly improved your work environment with a sophisticated and versatile device. Completely wireless enabled, the EasyAssist facilitates clear communication without interruptions to further add professionalism to your workspace.

Push to Talk

EasyAssist wireless call buttons are the best way to add functionality to your two-way radio deployment. Anywhere there are customers or employees that need to interact – **EasyAssist is there.**

EasyAssist is self contained, easily programmable and reprogrammable for permanent or temporary installations all over your work environment.

HOW IT WORKS
